

VIOTRAN

VIP03 IP extender - Transmitter and Receiver pair

Extending IP range beyond 100 meters

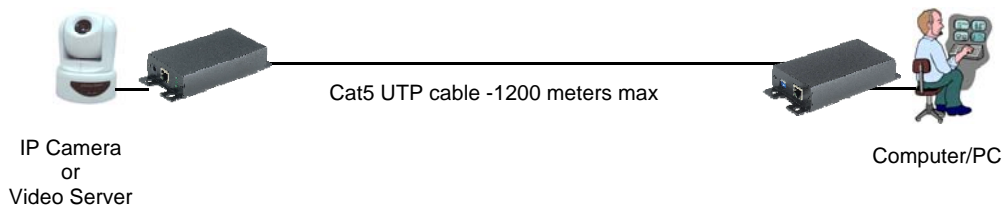

VIP03 IP extender is designed to extend the transmission range of any IP based device up to 1.2 Km over Cat5 UTP cable. It is completely transparent to protocols, codes, and applications ensuring compatibility with any IP camera and its management software. It is a perfect solution for sending IP video links from remote camera installation up to 1200 meters away.

Features:

- Send and extend IP camera signal or any TCP/IP devices over Cat5 UTP cable.
- Active type, including transmitter and receiver.
- Plug and play for easy connection
- Long range transmission up to 1200 meters max.
